

New Learning Path Alert

Gen AI & Agentic AI Fundamentals — Now Live on Teradata University

We've launched a new podcast-style video playlist on Teradata University covering the fundamentals of **Generative AI and Agentic AI** — and it's a required prerequisite for the **Concepts2Code: Teradata Agentic AI Overview hands-on lab**. This series is conversational, modular, and fully self-paced — no slides, no lectures.

What the Playlist Covers:

- **Generative AI Foundations** — how Gen AI works, its limitations, and practical prompt engineering techniques
- **Agentic AI** — agentic system levels (0–4), and design patterns including Chain of Thought, ReAct, Self-Reflection, and Tool Use
- **Model Context Protocol (MCP)** — what it is, how it works, and its role in agentic workflows
- **Lab Prep** — foundational content on Google's Agent Development Kit (ADK) and Teradata's MCP integration

What Comes Next:

Once you've completed the playlist, enroll in **Concepts2Code: Teradata Agentic AI Overview** — a guided hands-on lab offered regularly as Office Hours through Teradata University.

Start the playlist on **Teradata University** today.

Introduction to Open Table Formats (OTFs)

EMEA / AMS

 August 20, 2026

 04:00 p.m. CEST |

10:00 a.m. EDT

Audience: All Learners

AUS / APJ

 August 20, 2026

 02:00 p.m. AEDT |

12:00 p.m. SGT

Join our upcoming Teradata **Virtual User Groups (VUG)** session, **Introduction to Open Table Formats (OTFs)**, and learn how OTFs are transforming modern data architectures.

Explore key concepts, benefits, and leading formats such as **Apache Iceberg** and **Delta Lake**, and understand how they enable greater interoperability, scalability, and efficient data management across analytics platforms.

The session will also cover **Managed OTFs in Teradata**, highlighting their role in seamless data access and governance. Gain practical insights into building flexible, cost-effective data ecosystems that support improved data accessibility, governance, and advanced analytics outcomes.

Pick your slots for the live sessions today, and share this email with your colleagues.

Feel free to listen to the recordings at your convenience on our **Teradata Virtual User Groups (VUG)** workspace.

Live Demo

Accelerating AI Workloads With Arrow Flight SQL on Teradata

 Tuesday, August 25, 2026

8 a.m. PT | 11 a.m. ET | 4 p.m. BST (UK) | 5 p.m. CEST

Presenters:

Debjani Panda, Director of Product Management, Teradata

What if the biggest bottleneck in your AI workflow isn't the model—it's getting data to it?

Many AI and analytics workflows across cloud, on-premises, and hybrid environments still rely on data movement, disconnected tools, and extra

processing steps that add complexity and slow performance. As models grow larger and workloads become more distributed, efficient data access becomes critical.

Join us on August 25 for a live demonstration of how **Arrow Flight SQL** accelerates data access and model scoring workflows, helping teams move from business question to answer with less friction and stronger performance.

What you'll see:

- A Python-based AI/ML workflow in Teradata AI Studio accessing data directly through Arrow Flight SQL, with no data movement and no extra steps
- High-performance model scoring against large datasets using native data access
- Real-world use cases, including distributed machine learning, data lake integration, LLM training, and real-time analytics

Teradata Virtual Instructor Led Training

Hands-On Virtual Classes in 2026

Find a class in your time zone, and check back for added sessions

* Virtual Instructor-Led classes are live with hands-on labs and have an associated cost. For scheduling, pricing, or to inquire about a different class, please contact customer.education@teradata.com.
